

At the

Biomedical Frontiers

science and engineering for
high school students

Who:	Grades 8-12
When:	Wednesdays, 6:30 pm – 8:00 pm, Starts Sept. 10
Where:	The Innovation Institute

A rare opportunity to explore the biomedical science and engineering research frontier within a seminar format.

Topics include:

- cancer therapeutics & nanotechnology
- medical applications of quantum mechanics
- tissue engineering
- microbiomes
- 3D printing medical developments

Six to seven science and engineering specialists will lead classes focused exclusively upon their research areas. The At the Frontiers program director will facilitate the seminar.
